The team-taught, small-class format maximizes interaction among teachers and students, creating a learning community that helps with the individual and collective learning process. The communicative and collaborative approach facilitates rapid development of oral and written communication skills. Student-centered activities promote development of learner autonomy. A variety of electronic instructional programs at the Anderson Language Technology Center will be incorporated into the instruction. In addition to classroom and lab work, cultural activities involving the local community will be a part of the curriculum.
